

Adaptable and Affordable

## Yeostar Unified Communications Solutions for Secure K12 Schools and Efficient School Communications

The technology has transformed the K-12 education in involving families and school communities to better instruct students and bringing a more responsive emergency management system. But not all schools can afford to utilize the latest technology by upgrading or replacing their older, outdated system. They have to weigh the benefits of the telecom investment against the burden of limited IT budget. Fortunately, Yeostar Unified Communications have stepped in to make technology more cost-effective for K-12 schools of any size.

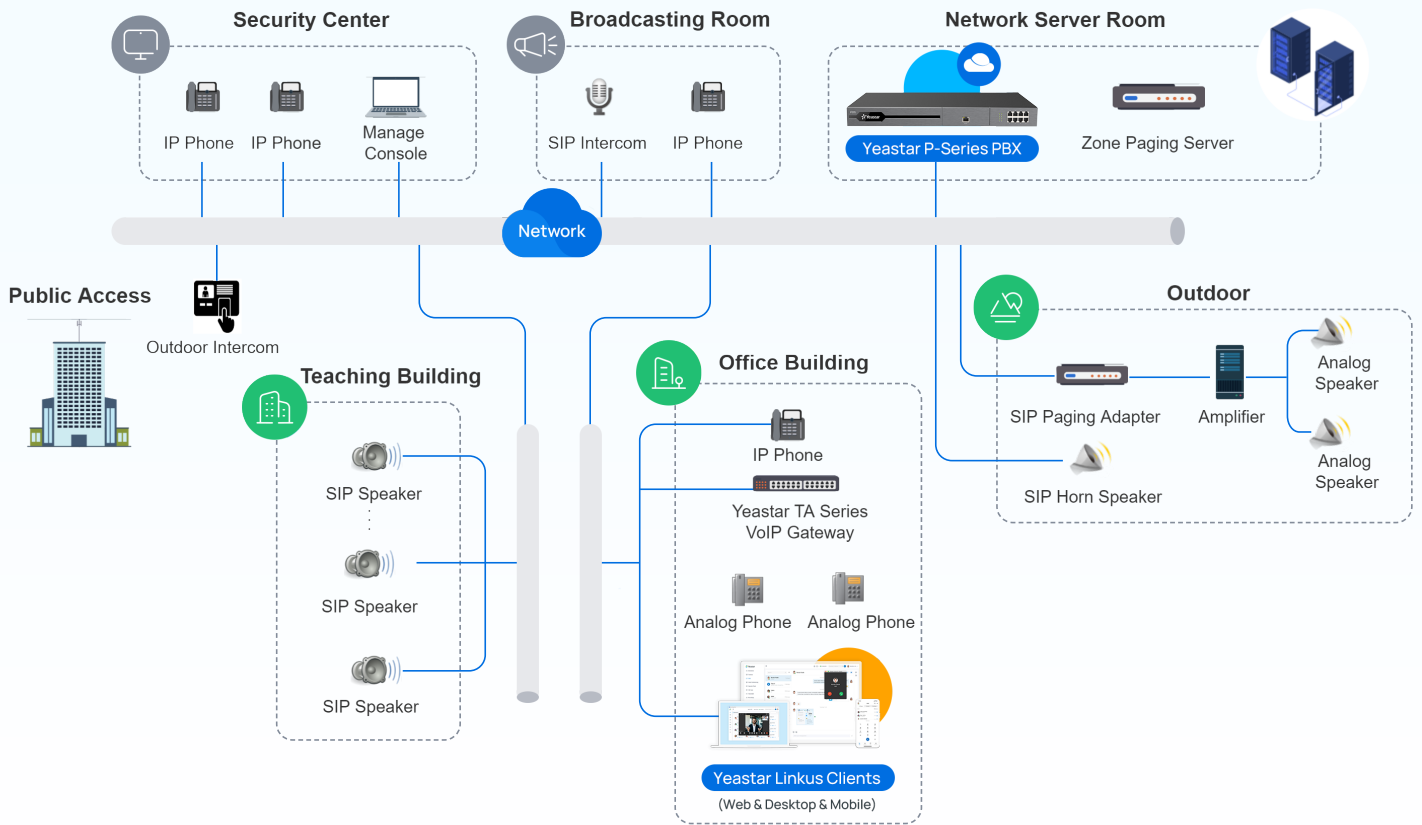

### How Yeostar Unified Communications solutions can help?

Built with K-12 schools in mind, Yeostar's award-winning Unified Communications solutions provide robust and easy-to-use features to constitute safer and better collaborated schools at the right price. By leveraging the leading VoIP and Unified Communications technology, schools can utilize the E-Rate funded internet connection without replacing their existing phone, paging system and security system, radically strengthening safety and collaboration while slashing the overhead cost. Also, they can reserve the budget for other educational investments, and increase the possibility of receiving funding support from the E-Rate program.

### Solution Benefits At-a-Glance

- ✓ Easily integrate with existing phones, paging system, security system, etc.
- ✓ Seamlessly upgrade analog IT equipment to VoIP
- ✓ Public access control anywhere anytime from any device
- ✓ Built-in security mechanism to prevent net threats and internal malfeasance
- ✓ Facility-wide announcements and agile emergency management
- ✓ All-inclusive communications features free of any charge
- ✓ Unified Communications features like presence, instant messaging, file sharing, conferencing, etc.
